BOTANICAL LABORATORIES

UNIVERSITY OF TORONTO

April 7, 1919 191

President Sir R. A. Falconer,

University of Toronto

Dear President Falconer,

We are still hoping that there is even yet a chance that the Ontario Legislature during the present session might be induced to vote us a new laboratory building. In any event, we feel that there would be an advantage in advising with you at an early date with respect to the possibilities of our present location. If you think well of it we would like to go over the situation with you on the ground and at such time as will suit your convenience. With respect to a grant for greenhouses, I have felt that this matter should not be dealt with separately from the grant for a laboratory building, but on this question also we would be glad of your counsel.

Respectfully yours,

J. H. Faull
